The Rationalized level is similar to the ISO SAM Tier 1 in the ISO 19770 model, and the Dynamic level generally corresponds to the ISO SAM Tiers 2, 3, and 4. For more information on the ISO model, see ISO/IEC 19770-1:2012 - Information technology — Software asset management — Part 1: Processes and tiered assessment of conformance.

The SAM Optimization Model - download.microsoft.com

ISO/IEC 19770-1 is a framework of ITAM processes to enable an organization to prove that it is performing software asset management to a standard sufficient to satisfy corporate governance requirements and ensure effective support for IT asset management overall.

ISO 19770-1:2017 was a major update and was rewrote the standard to conform to the ISO Management System Standards (MSS) format. The tiered structure from 197701:2012 was moved to an appendix within the updated standard. Intended Users. This document can be used by any organization and can be applied to all types of IT assets.

ISO/IEC 19770 - Wikipedia

ISO19770-1 has gone through something of a substantial overhaul since its last iteration in 2012. Dave Bicket, Jintaro Shinoda and Yoshinori Takahashi have grasped the nettle, and with the support of the WG21 community, have sought to make the revised standard fit for adoption and integration with other ISO standards.
